

Dog Training and Behavior Intervention Practices

Purpose

This policy serves to govern those practices that a Certification Council for Professional Dog Trainers (CCPDT) certificant may not use during the practice of dog training or behavior modification. This policy will clarify for dog owners and dog care professionals those practices in which a CCPDT certificant may not engage.

The CCPDT recognizes that this policy does not address every practice under debate in the dog training industry. The goal of this policy is to ensure that CCPDT certificants do not engage in certain practices which can in no way be considered humane or sound by scientific standards. It also acknowledges that certain additional practices remain under debate, such as the use of electronic stimulation collars. This policy is intended as a first step in ensuring that CCPDT certificants are not using practices that are potentially egregiously harmful to dogs, either physically or emotionally.

Policy

Definition

For the purposes of this policy, an electrical stimulation collar is defined as a collar which is used in a mode that causes electrical energy to pass through any part of the dog's body.

Policy

The following practices are never acceptable for use by a CCPDT certificant, for any reason:

- Helicoptering or hanging a dog (defined as lifting the dog off of the ground and either holding it off of the ground or swinging the dog off of the ground by the collar or leash for any period of time) or otherwise restricting the airway of the dog in any manner.
- Purposely lifting a dog by the collar, leash, or scruff such that two or fewer of the dog's legs remain on the ground.
- Applying a collar that delivers an electrical stimulation to a dog without first exhausting alternative intervention strategies, including, at a minimum, positive reinforcement of alternative behaviors, changes in antecedent stimuli, and either negative punishment, negative reinforcement, or extinction.
- Applying more than one (1) electrical stimulation collar to a dog at the same time.
- Applying an electrical stimulation collar to the genital region or abdomen area of the dog.
- Applying a toe or ear pinch (defined as applying a pinching pressure either with the hand or with a tool of any sort - including but not limited to a cord or wire - to a toe, ear or any other body part of the dog with the intention of causing the dog to perform or cease a behavior).
- Drowning (defined as submersion of the dog's head in water for any period of time).
- Applying a cattle prod to any part of the dog's body.

No trainer or behavior consultant who has been certified through a CCPDT certification program shall engage in any of the above-named acts for any reason. To report any such conduct by a trainer or behavior consultant whom you believe has been certified through one of the CCPDT's certification programs, please refer to the CCPDT's Certification Compliance and Disciplinary Procedures or contact our administrator at administrator@ccpdt.org.
