

Certification Council for
Professional Dog Trainers®

Test Content Outline

The Certification Council for Professional Dog Trainers (CCPDT) Exam Committee and Board of Directors shall develop the test content outline for each of its examinations, including the weightings of the domains and subheadings, to ensure it is in keeping with current practice, knowledge, and methods in the profession every five (5) years upon completing the job task analysis. The initial draft of the outlines may be delegated to the job task analysis committee for review and recommendation, but the Board of Directors shall issue the final approval of any test content outline.

All test content outlines, including the weighting of the major domains, shall be included in the respective Handbook for Candidates. Future forms of the examinations will be based on the most current approved version of the outlines.
